Francisco Javier González Fernández

Senior Software Engineer

Profile

Senior Software Engineer with 8+ years of experience driving the design and evolution of scalable web architectures and cloud-based ecosystems. Specialized in building maintainable, high-performance applications through clean design principles and modern frameworks. Recognized for providing technical leadership, aligning engineering initiatives with business goals, and fostering a culture of quality, collaboration, and continuous improvement across teams. Adaptable to both onsite and distributed environments, with strong communication and mentoring skills.

Work Experience

- SENIOR SOFTWARE ENGINEER –
AI-Driven Product Development

Jan 2026 - Present

Switzerland

 - Driving **AI-first** product development and portfolio expansion by architecting production-grade full-stack applications that combine cutting-edge web and AI technologies. Experimenting with emerging frameworks (Next.js 16, React 19, NestJS, PostgreSQL 18) and integrating AI-powered platforms such as Supabase and V0 to define efficient, modern workflows. Owning end-to-end delivery—from **UI/UX design** and type-safe front-end architecture to backend APIs, DevOps strategies, and **high-performing** deployments on Vercel—consistently achieving top-tier performance and accessibility standards.
- LEAD SOFTWARE ENGINEER

Jul 2022 - Dec 2025

Telefonica, Madrid

 - Led** the technical migration and integration of Adobe Experience Manager (AEM) within Telefónica's digital ecosystem, overseeing **architectural evolution** and ensuring security compliance at both network and application layers. Directed a **cross-functional team** through iterative delivery cycles, translating business requirements into scalable technical solutions. Acted as **technical liaison** with business stakeholders, defining workflows, validating implementation quality (code reviews, PRs), and presenting progress and **strategic roadmaps** to senior **management**.
 - Architected** and led the development of a modular ecosystem of SPAs using React and NextJS, establishing the foundation and technical direction for multiple business units. Designed cross-cutting solutions and shared libraries to ensure scalability, maintainability, and consistency across projects. Provided **architectural guidance** and mentoring to a 30-member engineering team, enabling parallel development while aligning deliverables with long-term product and technology strategy.
